

THE WORM IS NOT FOR BURNING AT DESA KEDISAN SATURDAY MAY 28TH 2022

There is an unspoken requirement for some sort of quid pro quo. When we burned our ginormous Ehoma at InterHash '88 - it was a good 40 foot high - we did it on the peninsula of Nusa Dua. BTDC had reluctantly given us the go-ahead, in consideration of the fact that we had filled their hotels during a recurrently lean period. Perfect spot for worm burning - still is - and I agree with WORM that we should do it by the seaside. Mertha Sari would be ideal; Nusa Dua better. You could run 'em out the south gate by CLUB KUD and thro the sewage decantation lake and into the mangrove swamp. Most invigorating. Seriously though, we should incinerate the worm asap and, I suggest, combine it with the s^hreening of BALI HASH. Could easily be set up with sheet and beam on the strand and - voila, the best documentation and entertainment of any HASH event ever. There must be several copies of the film in case - DISCOWANKER, IBM, BLOW JOE and the RUM JUNGLE archives?

Was it SNOWBALLER who filmed the long and the short of it on Saturday? Pretty spectacular, especially that irrigation tunnel on the S and L, and vertiginous viaduct after the split. Breathtaking performance - thank you HARES WHITEBAIT, HANDJOB and BARNACLE BALLS plus CUMONYERBACK who must be fully fledged by now. And extremely sensible lengths of 4½ and 8 k; so everyone s^hould have been OK IN well before dark. But oh dear me no! Someone in our flock will have to guard GERMAN SHEPHERD whom we do not wish to lose. See what I mean about keeping an eye on back runners and SCBs. Ideally FRBs should hold a check until another HASHER hoves in view.

Big welcome back to MISTER BEAN who somewhat non-committal when asked about his exile in blighty. Is it really 2½ years - cor blimey? How has the grim interim evanesced? Top of the Bleeding Bungelow again said RINGTAIL. That's enough. OK IN. RED or BLUE? Up to you.
